DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-8,27-34, drawn to a method, program and/or apparatus classified in class 705, subclass 50.
 - II. Claims 9-20,35-46, drawn to a method, program and apparatus, classified in class 705, subclass 50.
 - III. Claims 21-25, and 47 are drawn to method and program, classified in class 705, subclass 50.
 - IV. Claims 26, 48-52, drawn to a method and program, classified in class 705, subclass 50.
 - V. Claim 53-61, drawn to an apparatus, classified in class 705, subclass 50.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II or II or IV or V or V (or any combinations thereof) are directed to related methods/programs/apparatuses. The related inventions are distinct if the inventions as claimed do not overlap in scope, i.e., are mutually exclusive; the inventions as claimed are not obvious variants; and the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect. See MPEP § 806.05(j). In the instant case, the inventions each have different effects.

Art Unit: 3624

3. Because these inventions are independent or distinct for the reasons given above and the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.
4. Applicant's election without traverse of Group II in the reply filed on May 02 2006 is acknowledged.
5. This application contains claims 1-8,21-34,47-61 drawn to an invention nonelected with traverse. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.
6. *This application contains claims directed to the following patentably distinct species: Group I) a method comprising a shared executable hosted system; Group II) a method comprising a multiple executable procurement system; Group III) a hosted executable procurement system. The species are independent or distinct because they have different modes of operation, different levels of scalability, and different levels of interconnectivity.*

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, 9 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim

Art Unit: 3624

is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

7. A telephone call was made to Paul Kravetz on 7-3-05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions

Art Unit: 3624

unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Richard C Weisberger whose telephone number is 571 272 6753. The examiner can normally be reached during the hours of Maxiflex.
